JASMIN SAHU

Information Technology Engineer Data Science Full-Stack Development

Email: jasminsahu2310@gmail.com | LinkedIn: linkedin.com/in/JasminSahu | GitHub: github.com/Jasminsahu23

PROFILE Information Technology undergraduate with a 9.0 CGPA and Data Science Honours, interested in software development, data analytics, AI/ML and building practical technology solutions. Hands-on experience with React, Node.js, Express, MongoDB, Python, SQL, Tableau and Power BI through academic and externship projects.

EDUCATION

B.E. Information Technology 2023 2027

K.C. College of Engineering, Thane University of Mumbai
Data Science Honours CGPA: 9.0

TECHNICAL SKILLS

Languages	Python, JavaScript, SQL, C/C++
Web Development	React, Vite, Node.js, Express.js, HTML, CSS
Data & Analytics	Pandas, NumPy, Tableau, Power BI, Excel, SQL
Databases	MongoDB, MySQL, SQLite
Tools	Git, GitHub, VS Code

PROJECTS

Smart Community Disease Surveillance 2.0 | AI / Data / Geospatial
Designed an AI-powered community health surveillance platform for early detection and monitoring of potential disease outbreaks.
Integrated outbreak prediction, water-quality monitoring, mosquito hotspot detection, citizen symptom reporting, geospatial heatmaps, government alerts and a GenAI assistant for health officers.

Accessible Job Portal | React, Vite, Node.js, Express.js, MongoDB
Built a full-stack employment platform focused on inclusive and accessibility-aware job discovery for differently-abled job seekers.
Implemented job seeker and employer dashboards, job posting and applications, remote-work and wheelchair-accessibility filters, with keyboard-friendly and screen-reader-aware UX.

Flight Delay Prediction System | Python, Machine Learning, Data Visualization
Developed a machine-learning web application concept for predicting flight delays from historical flight information, including preprocessing, feature engineering and prediction.

Housing Market Analytics | Python, Pandas, NumPy, SQL, Excel, Tableau
Analyzed and visualized housing market trends during a SmartInternz Data Analytics externship, converting raw data into interactive Tableau insights.

CampusNexus AI | Generative AI, RAG, AI Agents
Designed an intelligent campus-management platform concept connecting attendance, fees, exams, library, timetable, placements and student support through AI-powered workflows and RAG.

EXPERIENCE & TRAINING

SmartInternz SmartBridge Data Analytics Externship
Project: Visualizing Housing Market Trends Using Tableau Python, Pandas, NumPy, SQL, Excel, Tableau

Tata iQ Forage GenAI Powered Data Analytics Simulation
Applied data analytics concepts in a practical GenAI-focused business simulation.

ADDITIONAL STRENGTHS

Data Analytics Machine Learning Artificial Intelligence Generative AI Data Visualization Full-Stack Development Problem Solving Accessibility-focused UX

PORTFOLIO

Portfolio: Personal website showcasing projects, technical skills and experience. Resume file is prepared for direct use in the portfolio's download button.
